

DaeIn Lee

Programmer

Hello, I'm DaeIn Lee from Samsung Research.

I like to solve brain teasing problems in the field of CSE.

As a fast learner, I am confident that I can satisfy expectations of coworkers.

Experience

Feb 2020 – *present*

SW Engineer at [Samsung Research](#)

Samsung Research is the advanced research and development (R&D) hub of Samsung Electronics.

The hub leads the development of the future technologies with more than 10,000 researchers and developers working in overseas R&D centers.

- Software Capacity Building T/F

Jun 2019 – Aug 2019

Intern at [Samsung Research](#)

- Software engineering internship at Smart Device team.
- 8 week internship to develop smart switch circuit PMU firmware with the purpose of increasing power efficiency.

Awards

Hanyang Academic Achievement Award from Hanyang Univ.

- 2018, 2nd semester
- 2017, 2nd semester(Highest Honor)

Hanyang Brain Scholarship from Hanyang Univ.

- 2019, 1st semester
- 2018, 1st/2nd semester
- 2017, 2nd semester

Nov 2018

Win 2nd place in advanced group from Hanyang Collegiate Programming Contest 2018

Jan 2019 – Feb 2019

Intern at [LG CNS](#)

- Software Engineering Internship at Development Platform team.
- 6 week internship to develop new Enterprise Application Platform pages.
- Gained better understanding of overall web development.

Jan 2019 – Feb 2019

Intern at [Fortify Inc.](#)

- Building responsive homepage for 'fortify.pro'.
- Backend/frontend development and service usage analysis using mongoDB for Gaia Landscape Inc.

Education

Mar 2014 – Feb 2020

Bachelor in Computer Science & Engineering from Hanyang University, Seoul with GPA of 4.0 (major 4.28) / 4.5

- Concurrent Programming
- Data Science
- Operating Systems
- Computer Architecture
- Database Systems
- System Programming

Nov 2019

Engineer Information Processing (정보처리기사)

Dec 2017

Win 2nd place in advanced group from Hanyang Collegiate Programming Contest 2017

Sep 2017

Advanced to final competition from Kakao Code Festival 2017

Reading

Mar 2018 – Dec 2018

Mentor at Hanyang Mentoring Program

Mentoring for the major courses of CSE with juniors

- Data Structure; Teaching & helping sophomores on the data structure course.
- Database Systems; Teaching & helping sophomores on the database system course.
- Awarded 'Hanyang Best Mentor' for mentoring Database Systems course.

Mar 2014 – Dec 2014

Mentor at Hanmille, Foreigner Mentoring Program

Mentoring & helping foreign students to easily adjust to Korea.

Projects

Bw-Tree Performance Boosting : Aug 2018 – Oct 2019

Evaluating cache / multi thread Performance of [Open Bw-Tree](#) to find bottleneck and improvement performance.

- Implementing update function based on the [page](#).
- Make update function atomic & reduce call of traverse function.
- Design TaS implemented Bw-Tree instead of CaS to reduce the overhead of failed CaS operations.

Wait-free Snapshot with Epoch Based Garbage Collection :

Oct 2019 – Oct 2019

Concurrent Programming Course

- Implementing Wait-free Snapshot based on the textbook 'The Art of Multiprocessor Programming'
- Concurrent update & scan function implemented
- Implement epoch based garbage collection to prevent memory leak & concurrent GC.

Enhanced xv6 : Mar 2018 – Jun 2018

Operating System Course

- Implement MLFQ & Stride scheduling instead of round robin scheduling.
- Implement Light Weight Process that can be used with most of POSIX-thread functions.
- Implement 'triple indirect block addressing' supporting large file upto 1030 MB instead of original 70 KB.
